VITEK® REVEAL™

SCALABLE TO FIT ANY LAB

MORTALITY ODDS INCREASE
9% EVERY HOUR 

**BETWEEN PRESENTATION
& ANTIBIOTIC
ADMINISTRATION**

IN PATIENTS WITH SEPSIS²

FAST

- Results in an average of 5.5-6 hours and as early 3 hours^{3,4}
- Direct from positive blood culture

ACTIONABLE

- Wide antimicrobial coverage for gram-negative bloodstream infections
- Allows faster antimicrobial therapy de-escalation to support antimicrobial stewardship
- Real-time monitoring of minimum inhibitory concentration (MIC) results

INTEGRATED

- Fully integrated within the bioMérieux Sepsis Solution
- Access bioMérieux services, including consultancy and education
- Bi-directional connectivity with MAESTRIA™

BIOMÉRIEUX

VITEK® REVEAL™

Integrates seamlessly within the sepsis care workflow.
